

LIB3 - Information Competency

Assignment 6 - Creating a personal Web page

Purpose

- To become familiar with the process of creating a Web page.
- To acquire skills in manipulating electronic files.

Instruction

1. Go to **Yahoo! GeoCities** at: <http://www.geocities.com>.

Log-in and select either **Yahoo! PageWizards** or **Yahoo! PageBuilder** to start building your Web page. Your Web page can either be a personal Web page or a Web page for an organization (your own or imaginary organization). Follow the step-by-step guide to complete your Web page.

After completion, **Yahoo! GeoCities** will automatically give you a link to your new Web page. You will submit this assignment by giving me the URL of your Web page.

2. You may also create your Web page using any resources of your choice. Save your Web page as an HTML document and submit it to me. I will post it on the course Web site.
3. This assignment will be graded according to the quality of the text and the esthetics of the presentation.
4. Please remember that your Web page will be posted on the Internet, accessible for viewing to the whole world.
